ABOUT ME

Who's behind SF6WTT?

ABOUT ME — WAEL

Wael

Who I am:

- Former 3rd Strike Player (Participated in 1st TOUGEKI SBO, Former EU Champ)
- Former TO of the biggest European event at the time (World Game Cup + RedBull Kumite)

What I do for a living:

- Started as Mobile Game Designer (Namco / Ea / Sega / Konami / Gumi)
- Game Design Teacher @Isart Digital (2nd best school worldwide, source : GameSchools.com)

Why I built SF6WTT:

- Needed to track my progress on fundamentals
- Had back surgery and couldn’t play for a while, I wanted to use my time in a meaningful way.

INTRODUCTION

Why does SF6WTT exist?

WHY SF6WTT?

The Problem

SF6's Training Mode is limited:

- No automated reaction drills
- No hit confirm tracking
- No post-guard analysis
- No custom combo trials
- No progression statistics

The Solution: SF6WTT

8 training modules integrated directly into the game via REFramework, filling all these gaps.

INSTALLATION

Setting up SF6WTT

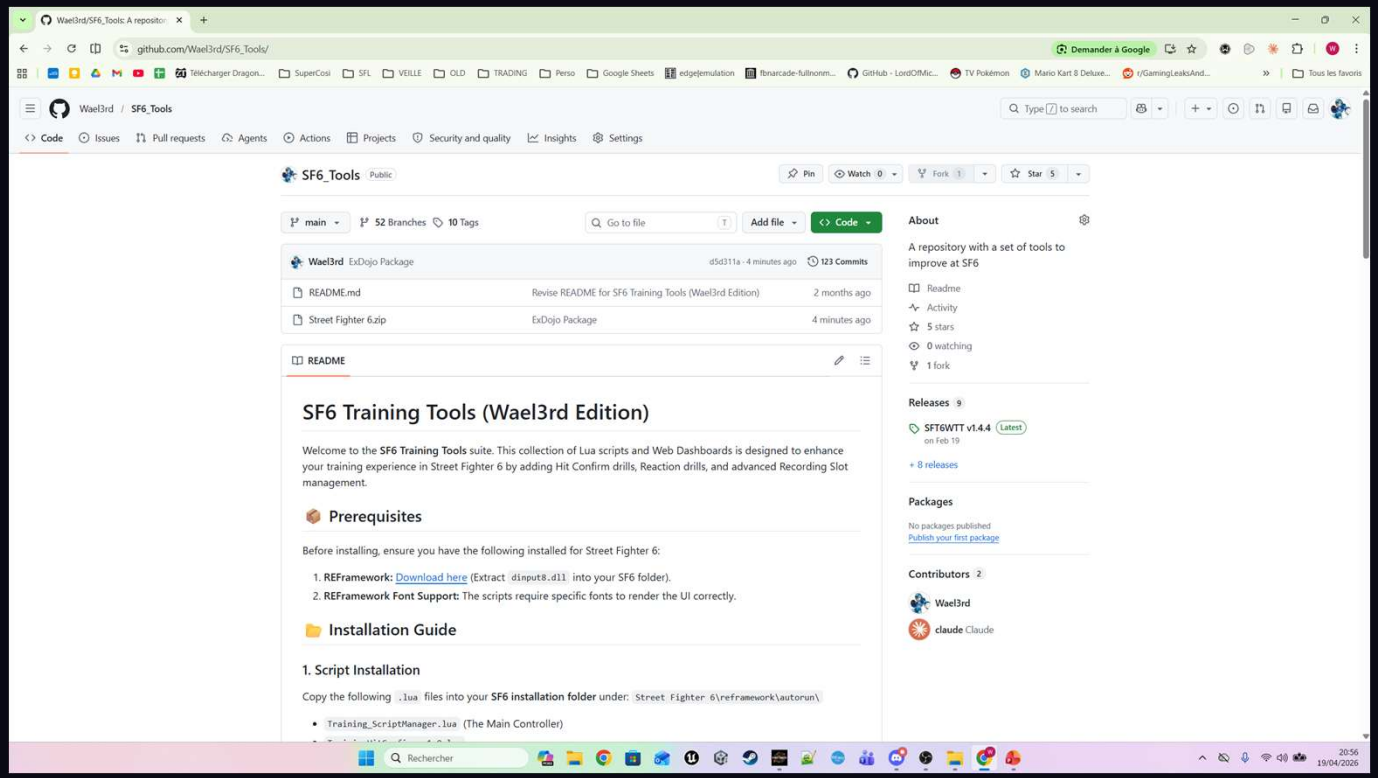
INSTALLATION — Step 2: SF6WTT

Install SF6WTT mods

1. Download the reframework.zip file
2. Extract the reframework/ folder into the same folder as StreetFighter6.exe

Expected structure:

```
Street Fighter 6/
  StreetFighter6.exe
  dinput8.dll
  reframework/
    autorun/
    data/
    fonts/
```



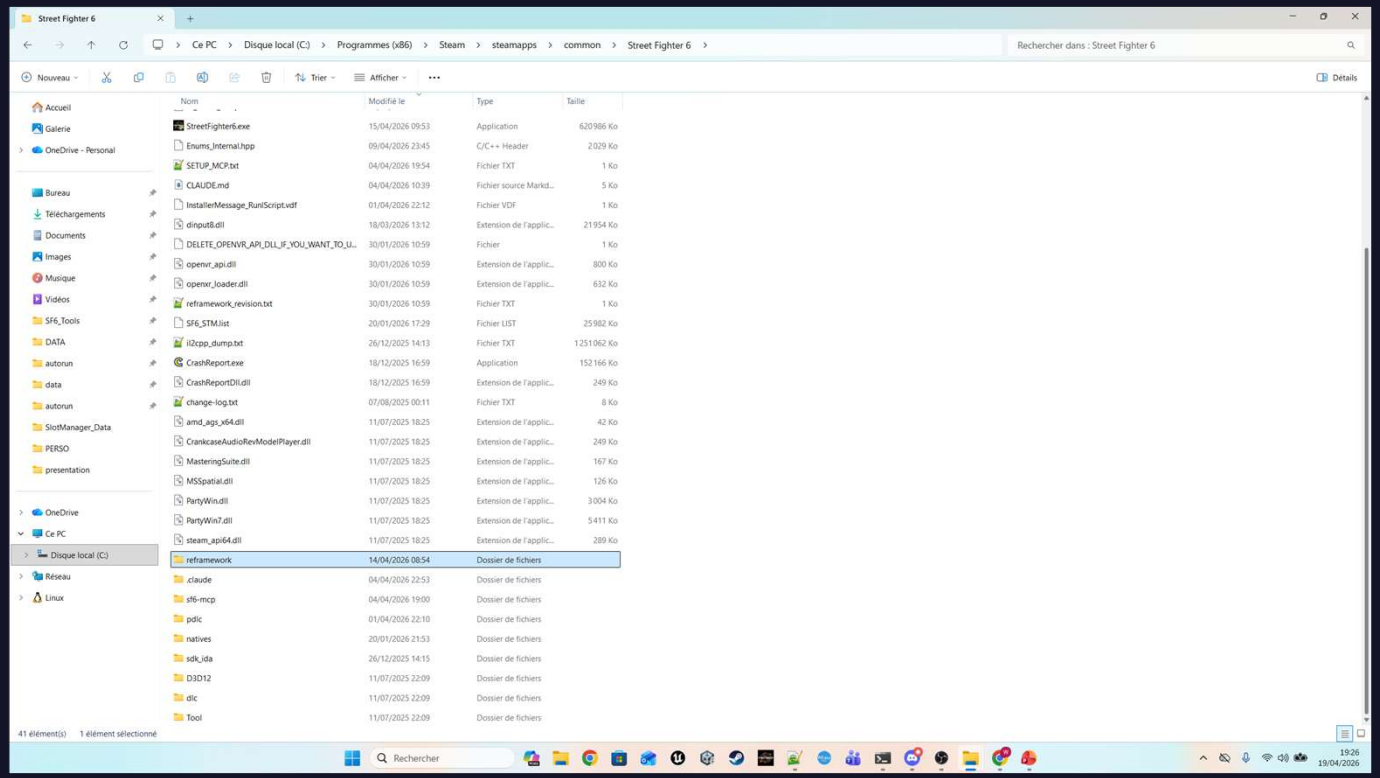
INSTALLATION — Step 2: SF6WTT

Install SF6WTT mods

1. Download the reframework.zip file
2. Extract the reframework/ folder into the same folder as StreetFighter6.exe

Expected structure:

```
Street Fighter 6/
  StreetFighter6.exe
  dinput8.dll
  reframework/
    autorun/
    data/
    fonts/
    images/
    plugins/
```



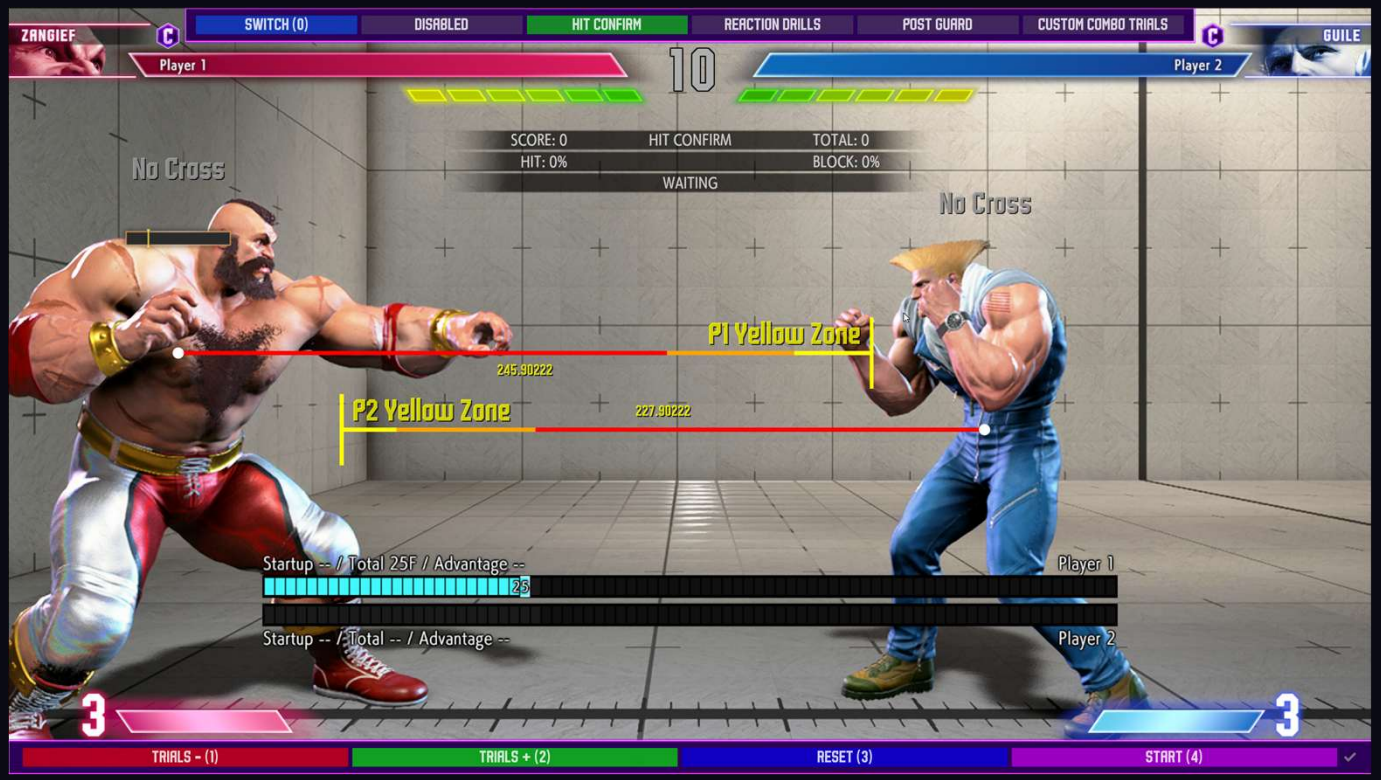
INSTALLATION — Verification

First Launch

1. Launch Street Fighter 6 normally
2. In training mode, press key 0
   or FUNCTION + Square/X on controller
3. The SF6WTT bar should appear at the top

If nothing shows up:

- Check that dinput8.dll is in the right place
- Check that .lua files are in autorun/
- Restart the game



REFRAMEWORK — The Basics

How To Use It

Display / Hide: press INSERT button on your keyboard

You can change it Configuration > Menu KEY

Script Runner Menu:

Where you can Run / Reset / Select Scripts

- Disclaimer 1 : You can't use mods in online battles, you can use them in online training though.
- Disclaimer 2 : This version saves if you check / uncheck scripts.

Script Generated UI Menu:

This is where you will have all your scripts and where you can make modifications to them.
